

Renlong Zhang

Senior Software Engineer · Backend, Data Infrastructure & Full-Stack

zrl0420@gmail.com linkedin.com/in/RenlongZhang tacq.github.io

SUMMARY

Senior software engineer with 10+ years of experience building large-scale backend services, financial data pipelines and full-stack / mobile products at **Google**, **YouTube**, **Chainalysis**, **Roblox** and **Huawei**. Led teams of up to 9 engineers and architected data systems contributing to **\$10M+ in quarterly revenue**. Deep expertise in payments and tax-compliance infrastructure, access control, and high-throughput API design.

EXPERIENCE

Senior Software Engineer

07/2025 – PRESENT

Google · YouTube RevTube

- **Earnings & payments infrastructure:** Lead development and scaling of the RevTube pipeline that computes earnings and distributes payments to YouTube creators and partners worldwide.
- **Tax compliance:** Architected and optimized tax data pipelines, ensuring accurate withholding and reporting across international tax jurisdictions.
- **Pipeline reliability:** Improved reliability and throughput of financial data processing, delivering timely, accurate payouts for high-volume partner accounts.

Staff Engineer & Engineering Manager

11/2022 – 07/2025

Chainalysis

- **Team leadership:** Managed a 9-engineer Data Enrichment team owning the company's highest-revenue data products.
- **DeFi Metadata Suite:** Spearheaded the design of a suite ingesting blockchain data into API and data-cloud feeds, contributing to **\$10M+ in quarterly revenue**.
- **Price Service:** Architected a scalable service ingesting massive hourly price-data feeds with high performance and low latency.
- **Ascriber pipeline:** Built a data pipeline for storage and quality control of entity data, guaranteeing cross-chain data integrity.

Senior Software Engineer

11/2018 – 11/2022

Google · GCP & YouTube

- **Access control:** Designed and built the access-control system securing core YouTube Live data entities across complex user-permission scenarios.
- **APIs & services:** Built high-scale services for creators and viewers, including entity-management APIs and the public YouTube Data API v3.
- **Google Cloud Talent Solution:** Maintained job-matching APIs and built a "Conversation Engine" powering conversational chatbots.

Full-Stack Software Engineer

01/2018 – 11/2018

Roblox

- Designed and shipped "Play Together" social game-card sharing and built mobile chat features.
- Integrated profanity filtering across front-end and back-end systems to improve platform safety.

Mobile Developer & Tech Lead Manager

09/2017 – 01/2018

Huawei Technologies

- Led a 6-engineer team building Android and iOS health-monitoring apps integrating streaming cameras and smartwatches.

CORE

Distributed systems design · API design & development · Big-data pipelines · Async services (queues, Pub/Sub) · Cloud infrastructure · Project scoping & tech leadership

TECHNOLOGIES

Spanner, Flume (FlumeJava) · Google Cloud Platform · Pub/Sub, large-scale RPC services

LANGUAGES

C++, Java (Google readability-certified) · Python, TypeScript (expert)

DOMAINS

Payments & tax compliance · Access control & security · Blockchain data · Creator platforms
