

Renlong Zhang

Senior Software Engineer & Tech Lead · Ads Systems, Backend, Data Infrastructure & Full-Stack

zrl0420@gmail.com linkedin.com/in/RenlongZhang tacq.github.io

SUMMARY

Senior / Staff-level IC software engineer and Tech Lead with 10+ years of experience architecting and building large-scale ads & backend services, financial data pipelines and full-stack / mobile products at **Google**, **YouTube**, **Chainalysis**, **Roblox** and **Huawei**. Currently serving as Tech Lead for **Google Ads BTI / BTO** (a projected **\$2B+/year** post-install & post-open app conversion initiative on Google Play), having previously served as Tech Lead for 9 engineers and architected data systems contributing to **\$10M+ in quarterly revenue**.

EXPERIENCE

Senior Software Engineer & Tech Lead

07/2026 – PRESENT

Google · Google Ads (BTI / BTO)

- **Tech Lead — BTI & BTO (\$2B+/yr projected impact):** Serve as Tech Lead for **BTI (Beyond the Install)** and **BTO (Beyond the Open)**, flagship ad engagement initiatives projected at **\$2B+ in annual revenue** that show targeted ads after app installation to encourage users to open the app (BTI) and drive deeper post-open conversions such as registrations and in-app purchases (BTO).
- **BTO on Google Play (Hands-on IC & TL):** Personally leading the end-to-end technical architecture, hands-on implementation, and production launch of **BTO on Google Play**.
- **Technical roadmap & architecture governance:** Drive multi-quarter technical roadmap and execution across the team, reviewing teammates' system designs, engineering proposals, and production code.

Senior Software Engineer

07/2025 – 07/2026

Google · YouTube RevTube

- **Earnings & payments infrastructure:** Led development and scaling of the RevTube pipeline that computes earnings and distributes payments to YouTube creators and partners worldwide.
- **Tax compliance:** Architected and optimized tax data pipelines, ensuring accurate withholding and reporting across international tax jurisdictions.
- **Pipeline reliability:** Improved reliability and throughput of financial data processing, delivering timely, accurate payouts for high-volume partner accounts.

Staff Software Engineer & Tech Lead

11/2022 – 07/2025

Chainalysis

- **Technical leadership:** Served as Tech Lead for 9 engineers on the Data Enrichment team, driving system architecture and technical execution for the company's highest-revenue data products.
- **DeFi Metadata Suite:** Spearheaded the architecture and implementation of a suite ingesting blockchain data into API and data-cloud feeds, contributing to **\$10M+ in quarterly revenue**.
- **Price Service:** Architected a scalable service ingesting massive hourly price-data feeds with high performance and low latency.
- **Ascriber pipeline:** Built a data pipeline for storage and quality control of entity data, guaranteeing cross-chain data integrity.

Senior Software Engineer

11/2018 – 11/2022

Google · GCP & YouTube

- **Access control:** Designed and built the access-control system securing core YouTube Live data entities across complex user-permission scenarios.
- **APIs & services:** Built high-scale services for creators and viewers, including entity-management APIs and the public YouTube Data API v3.
- **Google Cloud Talent Solution:** Maintained job-matching APIs and built a "Conversation Engine" powering conversational chatbots.

Full-Stack Software Engineer

01/2018 – 11/2018

Roblox

- Designed and shipped "Play Together" social game-card sharing and built mobile chat features.
- Integrated profanity filtering across front-end and back-end systems to improve platform safety.

Mobile Developer & Tech Lead

09/2017 – 01/2018

Huawei Technologies

- Served as Tech Lead for a 6-engineer team building Android and iOS health-monitoring apps integrating streaming cameras and smartwatches.

CORE

Tech leadership & roadmap planning · Distributed systems design · API design & development · Big-data pipelines · Async services (queues, Pub/Sub) · Cloud infrastructure

TECHNOLOGIES

Spanner, Flume (FlumeJava) · Google Cloud Platform · Pub/Sub, large-scale RPC services

LANGUAGES

C++, Java (Google readability-certified) · Python, TypeScript (expert)

DOMAINS

Ads & app conversion (BTI/BTO · Play) · Payments & tax compliance · Access control & security · Blockchain data & creator platforms
